

Sea Hunter™ Mark II

“MUCH MORE TO LIKE IN THIS MACHINE”

“The *Garrett Sea Hunter Mark II* did a good job of finding coins and jewelry. It was able to ignore the effects of salt water and punch deeply for treasure. I liked this new generation of pulse that provides a pleasing rise in tone rather than a ticking sound, and the microprocessor electronics that keep threshold steady with no need to constantly retune the detector...

“There is much more to like in this machine, which is submersible to 200’, includes submersible earphones, features a separate waterproof battery compartment, and gives the user four configurations to choose from. The bonus Discrete Trash Elimination mode is a welcome addition in trashy areas...and provided me with a second gold ring!”
